## Oh So Natural Table Top Design

A collection of local botanicals such as Green Mink Protea, Cattelya orchids, Bromeliads, Curly Willow, Lily Grass, Succulents, Dracaena and Jade are artistically arranged atop three contemporary living trays of fresh grass. Mini gardens of drought friendly plants such as orchids and succulents serve double-duty as favors for your guests. Natural elements of driftwood, red river rocks, pebbles, and dried pods complete the look of this table design.

### **EARTH FRIENDLY IDEAS:**

*The design incorporates live plants, succulents and sods that can be replanted. Juice glasses found at a vintage second hand store make unique candle holders. Mother of Pearl necklace is wrapped around each napkin as an embellishment, and it is also a favor for your guests to take home. Functional chandeliers always make a statement at any event, and it can easily be installed at your home after the wedding. What a great way to save a piece of wedding memory in your new home!*
